

PSYCHOPHARMACOLOGY

And Substance Abuse Newsletter

DIVISION 28

AMERICAN PSYCHOLOGICAL ASSOCIATION

DIVISION 28—AMERICAN PSYCHOLOGICAL ASSOCIATION

Summer 2003

Volume 36, No.2

From the President's Desk . . .

Frank A. Holloway

I am continually amazed at how much talent and energy our division's membership represents. Fred Risinger (Program Chair) and Scott Lane (Program Co-Chair) have put together a dynamite program for this year's convention in Toronto. The program summary is in this newsletter, but its highlights include a Symposium on NIDA's Clinical Trials Network, addresses by this year's Division Awardees, and A NIDA-sponsored Young Investigator's Poster Session on Friday night. NIAAA will be sponsoring the joint Division 28 and 50 Hospitality Suite. On other matters, John D. Roll, our membership chair, has recently updated the Division brochure. The Executive Committee is exploring ways to enhance the attractiveness of Division-sponsored event to new members, particularly young investigators. Last summer, Warren Bickel

instigated a monthly conference call with selected Executive Committee members. I've continued the practice and it has been real helpful in brain-storming and keeping abreast of both Division and APA issues. Finally, I received an e-mail from George Niederehe, Ph.D., Co-Chair of APA's Interdivisional Task Force on Practice in Clinical Geropsychology, complimenting our Division's input to the Task Force that was provided by the chair of our Division's Committee on Aging, Stephen A. Daniel, Ph.D. Your Executive Committee will be meeting at the CPDD Meeting in Bal Harbour, FL and at the APA Convention in Toronto. I hope to see many of you at one or both meetings. Keep up the good work.

Best regards,
Frank A. Holloway

REPORT ON THE WINTER 2003 MEETING OF THE APA COUNCIL OF REPRESENTATIVES

Editor's Note: This report was submitted collaboratively by Maxine Stitzer, Division 28's Council Representative, and Jalie Tucker, Division 50's Council Representative. Maxine and Jalie are Fellows in both divisions and interact frequently on Council issues that are important to both divisions. They have elected to share reporting responsibilities for this meeting.

APA's governing body, the Council of Representatives, convened on February 14 and 15, 2003 in Washington, D.C. for its annual Winter meeting. The meeting normally lasts for three days, but was adjourned early because of the incoming blizzard that blanketed the Northeast in mid-February. Not all Council members "escaped" in time, and many had to remain for several days in the Capital Hilton where the meeting was held. A few others got caught in hotels near D.C. metro airports. We were not among them, but the humorous email communications and pictures from this lively band of sequestered Council members made us almost wish we were there. As Council representatives often do when faced with a challenge, a new "Caucus of Snow Stuck Psychologists" (COSSP) was formed and awarded a prize to the member who got home last. Juan Rapadas, who traveled over 10,000 miles to attend his first Council meeting as Guam's first seated Council representative, was so distinguished.

On a more serious note, a highlight of the meeting was a brief address to Council by Daniel Kahneman, an Israeli psychologist who recently received the Nobel Prize in Economics for his work on decision-making, much of which was conducted in collaboration with Amos Tversky (now deceased). Dr. Kahneman spoke about the field of behavioral economics, an approach that has been successfully applied in the field of substance abuse. Economists have defined principles by which people behave in an economic environment and have developed creative ways to utilize these principles to encourage prudent behavior. For example, a plan to promote monetary savings has been devised and marketed by taking advantage of delay discounting principles; i.e., the common human tendency to value present rewards more than future rewards, even when they are of the same tangible value, is exploited in service of promoting savings.

EDITORIAL POLICY

The Psychopharmacology and Substance Abuse Newsletter is a thrice-yearly publication of Division 28. It is devoted to keeping its members informed about the activities of Division 28 and to the news and comments concerning all aspects of Psychopharmacology and Substance Abuse. Articles, comments, announcements, and advertisements should be sent to: petry@psychiatry.uchc.edu. Deadline for the Spring issue is January 15, 2003.

continued from page one

Dr. Kahneman strongly urged the APA to consider setting up joint programs in business and psychology, in order to keep such creative and socially important thinking within the scope of the discipline of psychology. He further observed that psychology's best avenue for influencing public policy was through having an influence on the discipline of economics, which has long enjoyed a central role in policy-making in areas of interest to psychology and other social and behavioral sciences.

APA President Robert Sternberg, a Yale psychologist well known for his research on intelligence testing, also gave an address to Council. As part of his presidential initiatives, Dr. Sternberg plans to write several books addressing pressing issues within each Directorate of the APA (Science, Practice, Public Interest, and Education). For example, his book as part of the Science initiative will be on principles of scientific reviewing. He also has already convened a presidential task force to review APA governance structures and processes and, as appropriate, to propose sensible steps aimed at streamlining operations and reducing costs while enhancing communication and productivity across APA's many governance groups.

Another highlight of the meeting was the presentation to Council of a video on animal research in psychopharmacology, which was produced with oversight by the Board of Scientific Affairs (BSA) and the Committee on Animal Research and Ethics (CARE). The 15-minute video is aimed at a high school audience and is intended to promote positive attitudes about science and the role of animal research, with drug abuse and psychopharmacology as the illustrative topic area. Featured in the video were Drs. Nancy Ator, Marilyn Carroll, Dorothy Hatsukami, Robert Balster, and Roy Pickens, along with several laboratory rats, mice and baboons. Among the topics covered were abuse liability testing, commonality between animal and human drug self-administration, research on alternative reinforcers in drug self-administration, research on inhalants and the humane treatment of animals in research. Kudos to Dr. Ator and all the members of BSA and CARE who worked on this important educational video project.

On a somber note, the APA budget was discussed. APA has lost about one third of its net worth due in large part to losses in its stock portfolio in the aftermath of September 11, 2001. To help remedy the shortfall, the two APA buildings were recently re-financed with 30-year mortgages at low interest rates with an overdraft that gives the organization a new influx of working capital. Both buildings are fully leased, which also is good news. Dr. Norman Anderson, the new APA Chief Executive Office (replacing Ray Fowler who retired in 12/02), is working with the APA Finance Committee to develop a balanced budget for the coming years. This will necessarily entail a reduction in central office staff, much of which has already taken place as part of the voluntary staff "buy-out" program that was implemented in 2002. The enduring downside of the staff reductions is that remaining staff members cannot cover all of the responsibilities of departing members. Governance and other APA activities therefore must be prioritized, downscaled, and/or shifted more toward the volunteer sector of the organization (e.g., APA boards and committees will be doing more of their own work, with reduced central staff support). And, yes Martha, there will almost certainly be increases in the cost of convention registration, CE workshops, and dues.

The weather-abbreviated meeting ended with a diversity and cultural sensitivity training session led by an external expert. This was a fitting event to be held at the first Council meeting to implement the "modified wildcard plan," which expanded the number of Council seats to include representatives from all APA divisions, U.S. states and territories, and Canadian provinces. Also for the first time, a representative of APAGS (American Psychological Association of Graduate Students) was seated on Council and on the APA Board of Directors. The APA Council (as well as other governance groups) is now diverse on many dimensions, now more so the APA membership at large. This positive development in governance will serve the organization well and reflects the efforts of many APA leaders, divisions, and other groups within APA.

DIVISION 28 THANKS THE FOLLOWING CORPORATIONS FOR THEIR GENEROUS SUPPORT:

Wyeth-Ayerst Pharmaceutical Company for their support of the Young Psychopharmacologist Award, and Lafayette Instruments
If you would like to make a tax-exempt donation, please contact
Dr. Jane Acri, APA Div. 28, P.O. Box 7735, Silver Spring, MD 20907, or by email at jacri@nih.gov

FOR OVER 50 YEARS LAFAYETTE INSTRUMENT COMPANY HAS PROVIDED LABORATORY INSTRUMENTATION THAT HAS BEEN THE FOUNDATION OF SCIENTIFIC LITERATURE IN THE FIELDS OF:

- Behavior • Assessment • Biofeedback • Psychophysiology
- Clinical Assessment • Cognitive Assessment • Psychological Diagnostics

**Lafayette
Instrument®**
3700 Sagamore Parkway North
P.O. Box 5720 - Lafayette IN, 47903 U.S.A.
(765) 423-1505 - Fax (765) 423-4111
E-Mail: lif@lafayetteinstrument.com - www.lafayetteinstrument.com

Lafayette Instrument Company is proud to have been a pioneer in the development of these disciplines. With this knowledge base and experience, combined with our propensity for technology, we are poised to continue our role in the future development of these areas. Please contact us with your specific requirements. We will be happy to assist you in meeting your needs.

LECTURES BY AWARD WINNERS VOREL, MORGAN, AND SOBELL TO BEGIN DIVISION 28 PROGRAM

For the fifth consecutive year, lectures by Division 28's three Award winners will begin the Division 28 Program at the annual APA convention. These presentations, featuring winners of the Outstanding Dissertation, Wyeth Young Psychopharmacologist, and Brady-Schuster Awards, will take place on Thursday, August 7 from 8:00-10:00 am.

At 8:00 am, ROB VOREL, M.D., Ph.D. of the Columbia University College of Physicians and Surgeons will receive the Outstanding Dissertation Award and give a 20-minute lecture. Dr. Vorel's presentation of his dissertation work, entitled "A Neural Circuit Underlying Cocaine-Seeking Behavior", will describe his explorations of the relation between cocaine-seeking behavior and the mesolimbic dopamine system. This research, which has led to a featured article in *Science*, was completed at Albert Einstein College of Medicine under the mentorship of Eliot Gardner, Ph.D.

Immediately following Dr. Vorel's talk, DRAKE MORGAN, Ph.D. of Wake Forest University School of Medicine will receive the Wyeth Young Psychopharmacologist Award and give a 20-minute lecture entitled "Some Pharmacological, Environmental, and Historical Determinants of Drug Sensitivity". Dr. Morgan's recent journal articles have described brain dopaminergic function in individually and socially housed

monkeys and the effects of reinforcement history on the reinforcing efficacy of cocaine. His current research program addresses the relationship between sensitivity to the analgesic effects of opioids and various measures of the reinforcing effects of opioids.

At 9:00 am, LINDA SOBELL, Ph.D. of Nova Southeastern University will receive the Brady-Schuster Award and give a 45-minute lecture entitled "The Process of Self-Change: Two Decades of Research Thinking Outside of the Box". Dr. Sobell's substance abuse research is internationally known and highly respected. In particular, her Timeline Followback technique is now widely used to quantify substance use in both laboratories and clinics, and her Guided Self-Change intervention has been incorporated in outpatient treatment programs throughout Ontario. She has over 200 publications across a variety of research areas, including self-report validity among alcohol abusers, natural recovery processes, and community-based approaches to reducing problem drinking.

These three presentations represent years of outstanding scientific research and are sure to include a variety of informative data across preclinical and clinical realms. Please show your support for Division 28 and the Awards program by attending these exciting lectures.

ADOLESCENT BRAIN DEVELOPMENT: VULNERABILITIES AND OPPORTUNITIES SEPTEMBER 18-20, 2003, NEW YORK CITY

Organizers: Ronald Dahl, University of Pittsburgh, Linda Spear, Binghamton University, Ann Kelley, University of Wisconsin - Madison and Richard Clayton, Kentucky School of Public Health, Lexington Jointly sponsored by the New York Academy of Sciences, Science and Technology Meetings Program, and the University of Pittsburgh School of Medicine, Center for Continuing Education; with the support of The Robert Wood Johnson Foundation and the Tobacco Etiology Research Network

This conference will bring together basic and clinical investigators performing research relevant to neurobehavioral changes during adolescent development. The long-term goal is to stimulate further investigations and advance understanding that will have clinical and social policy relevance to a wide range of behavioral and emotional health problems emerging in adolescence - particularly the development of nicotine dependence, alcohol and other substance use, risk-taking behaviors, depression and suicide. There is a Call for Abstracts for participation in a scheduled Poster Session. Contact for information and deadlines: New York Academy of Sciences; T: 212.838.0230 x 324; E:conference@nyas.org; For complete details visit: <<http://www.nyas.org/scitech/conf/adolbrain.cfm>>

Four Division 28 Members Will Present a Workshop at the APA Convention in Toronto this August

"Tobacco cessation: Offering effective treatments to your clients"
will be presented by Drs. Robert Shipley, Dorothy Hatdukami, Maxine Stitzer, and Marlyne Kilbey.

FACULTY POSITION AT JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE

A new faculty position at Instructor, Assistant or Associate Professor level is available at JHUSOM. The candidate would be expected to establish a line of independent research in clinical pharmacology or substance abuse treatment research at JHUSOM, which offers a rich array of facilities and a stimulating environment to support independent research activities. In addition, candidate would collaborate with PI of the Mid Atlantic Node of the National Drug Abuse Clinical Trials Network (CTN) to develop and direct study concepts and to help set future research directions. The CTN is a new national treatment-research partnership that conducts multi-site effectiveness studies of empirically based treatments for drug abuse within community treatment programs. Position is suitable for a M.D. or Ph.D. With training and experience in substance abuse treatment and research. Academic rank and pay grade depends on experience. Candidates should send vita and letter of interest to: Maxine L. Stitzer, Ph.D., Professor of Psychiatry and Behavioral Sciences, Mid Atlantic Clinical Trials Network, Room 580, Mason F. Lord Building, 4940 Eastern Avenue, Baltimore, MD 21224

FACULTY POSITION AT UNIVERSITY OF CONNECTICUT HEALTH CENTER

A new faculty position at Instructor or Assistant Professor level may be available starting this fall at University of Connecticut Health Center. The position will involve managing federally-funded grants related to the treatment of substance abuse and gambling disorders. The candidate will also analyze data and write papers for publication. The candidate will be assisted in developing an independent program of research and submitting grant applications. Only minimal teaching responsibilities are expected. Some clinical experience in the behavioral treatment of substance use disorders is necessary. Send vita and letter of interest to: Nancy Petry, Ph.D., Professor of Psychiatry, University of Connecticut Health Center, 263 Farmington Avenue, Farmington, CT 06030-3944.

SUBSTANCE ABUSE RESEARCH FELLOWSHIPS AT JOHNS HOPKINS

Postdoctoral research fellowships in stimulating, productive program with excellent resources. Prepare as independent investigator. HUMAN LABORATORY — behavioral & clinical pharmacology of abused drugs (abuse liability, self-administration, cognitive function, neuroimaging); anti-drug-abuse medications development. Opioids, cocaine, anxiolytics, alcohol, caffeine, nicotine. CLINICAL TRIALS – testing medications, verbal & behavioral therapies (esp. incentive/motivation-based), and combinations; psychiatric comorbidity research; addiction & pregnancy/women. Opioid, cocaine, tobacco, mixed/other dependencies. Start Date: Flexible, some now. Eligibility: citizen, permanent resident. A broad range of backgrounds are appropriate – from clinical/counseling to experimental/neuroscience. NIH stipend levels: \$34-51K+. Contact Sharon Walsh, George Bigelow, Roland Griffiths, or Maxine Stitzer; BPRU, Behavioral Biology Research Center; 5510 Nathan Shock Drive; Johns Hopkins Bayview Campus; Baltimore, Maryland 21224-6823. (410) 550-1060; swalsh@jhmi.edu. Cf <http://bpru.med.jhu.edu>

POST-DOCTORAL POSITION IN HUMAN BEHAVIORAL PHARMACOLOGY OF NICOTINE

A post-doctoral position in the behavioral pharmacology of nicotine in humans may be available in the laboratory of Dr. Kenneth A. Perkins at the University of Pittsburgh. Ongoing NIDA-supported projects include environmental modulation of nicotine discrimination, sex differences in influences on tobacco self-administration, and individual differences associated with sensitivity to nicotine, including genetic and personality factors. Applicants also interested in clinical research may become involved in smoking cessation studies. Interested candidates should send a C.V. and letter of interest to Dr. Perkins at the following address: Kenneth A. Perkins, Ph.D., Department of Psychiatry, University of Pittsburgh Medical Center, 3811 O'Hara Street, Pittsburgh, PA 15213. Voice: (412) 624-1716. Fax: (412) 624-6018. Email: perkinska@msx.upmc.edu. Website: <http://myprofile.cos.com/perkinsk31>

POST-DOCTORAL POSITION IN BEHAVIORAL PHARMACOLOGY AT UNIVERSITY OF MISSISSIPPI

Applications are invited for a post-doctoral research associate position in the Dept. of Psychiatry and Human Behavior to conduct research in the behavioral pharmacology of drugs of abuse. Candidates should have a Ph.D. in Experimental Psychology, Pharmacology or Neuroscience and some expertise in behavioral pharmacology. The successful candidate will be expected to supervise technicians, prepare reports and manuscripts for publication and present research results at national meetings. Salary is competitive and commensurate with experience. Applicants should send CV, a statement of research goals and names of 3 references to: William L. Woolverton, Ph.D., Dept. of Psychiatry & Human Behavior, Univ. of MS Medical Center, 2500 N. State Street, Jackson, MS, 39216.

POST-DOCTORAL CLINICAL CHEMICAL DEPENDENCY FELLOWSHIP

UNIVERSITY OF OKLAHOMA HEALTH SCIENCES CENTER, DEPARTMENT OF PSYCHIATRY AND BEHAVIORAL SCIENCES: invites applications for 1-2 full-time postdoctoral training positions in chemical dependency beginning July 1, 2002. The Chemical Dependency Fellowship Program is a one-year intensive educational experience aimed at providing a variety of clinical and didactic exposures to substance abuse issues. The program emphasizes: 1) assessment of substance abuse as part of the clinical presentation of any patient, in any setting; 2) pharmacology of drugs of abuse; 3) awareness of current research initiatives in the area of chemical dependency; 4) consultation and liaison with other health care providers concerning abuse issues; and 5) administrative issues involved in directing a treatment program, as well as community, legislative, and policy concerns. Additional opportunities for research and teaching are required. Generous stipend offered. Requirement: doctorate in Clinical or Counseling Psychology with APA-accredited internship completed by July 1, 2003. ABD applicants considered. Contact Frank Holloway, Ph.D.; program director for application materials or for additional information: Phone 405/271-5251 ext. 47688 or email: frank-holloway@ouhsc.edu. OR Send a CV, letter of intent, and three letters of recommendation to: Frank Holloway, Ph.D., Executive Director, Clinical Chemical Dependency Fellowship, University of Oklahoma Health Sciences Center, Department of Psychiatry & Behavioral Sciences, P. O. Box 26901, Oklahoma City, OK 73190

Post-Doctoral Research Fellowship in Substance Abuse

Research fellowship position (2-3yrs) is available in a stimulating and productive clinic. Participate in development, conduct, and publication of studies on behavioral treatments for cigarette smoking among pregnant women and for cocaine dependence. Must have completed doctoral training in psychology and have research experience. Individuals from disadvantaged groups encouraged to apply. Competitive stipends. Send letter of interest, vita, and letters of reference to: Stephen T. Higgins, Ph.D., Univ. of Vermont, 38 Fletcher Place, Burlington, VT 05401-1419.

Division 50 Program Summary Sheet

Times and locations are tentative, please confirm with program brochure

Symposium: Community-Based Approaches to Postincarceration Aftercare: Thurs., 8/7, 11:00 - 11:50, room 206E

Co-chairs: Bradley Olson, PhD; Leonard Jason, PhD

Community-Based Aftercare for Offenders in Texas: Kevin Knight, PhD, Patrick Flynn, PhD, Dwayne Simpson, PhD.

Correctional Treatment Policies and Outcomes: The CA Experience: David Farabee, PhD, Michael Prendergast PhD, William Burdon, PhD.

Community Reintegration for Formerly Incarcerated Offenders: The Oxford House Model: Bradley Olson, PhD, Leonard

Jason, PhD, Margaret Davis, PhD, Josefina Alvarez, PhD

Discussant: George De Leon, PhD

Symposium: Methamphetamine Research: Thurs., 8/7, 1:00 – 1:50, room 717A

Chair: Richard Rawson, PhD

History, Effects, and Extent of Problem of Methamphetamine Use: Richard Rawson, PhD.

Methamphetamine Treatment Project: Findings From a Multisite Treatment Study: James Herrell, PhD

Studying Methamphetamine Dependence and Treatment: A Longitudinal Follow-up: Maureen Hillhouse, PhD

Symposium: Substance Abuse Prevention, Treatment, and Service Delivery for Adolescent Girls: Thurs., 8/7, 2:00 – 3:50, room 104D

Chair: Cora Lee Wetherington, PhD

Substance Abuse Prevention, Treatment, and Service Delivery for Adolescent Girls: Amaro Hortensia, PhD

Gender-Specific Adolescent Drug Use Prevention: ATLAS and ATHENA: Diane Elliot, MD and co-author Linn Goldberg, MD

Treatment and Substance Abuse and PTSD for Adolescent Girls: Lisa Najavitz, PhD

Drug Abuse Services for Adolescent Girls: Redonna Chandler, PhD

Discussant: Beverly Pringle, PhD

Symposium: Personality Disorders and Psychosocial Functioning in Dually Diagnosed Outpatients: Fri., 8/8 9:00 – 9:50, room 205D

Chair: William Fals-Stewart, PhD

Impact of Personality Disorders on Psychosocial Functioning in the Dually Diagnosed on Treatment Outcome: Nancy Thomas, PhD

Implications for Assessment, Treatment Design, and Implementation: Patricia Hoffman-Judd, PhD

Workshop: Multidimensional Family Therapy for Adolescent Substance Abuse: Fri., 8/8, 2:00-2:50, room 714A

Chair: Howard A. Liddle, EdD

Symposium: Predictors of Risk for Children of Alcoholic and Drug-Abusing Parents: Fri., 8/8, 3:00 – 3:50, room 206A and 206B

Chair: William Fals-Stewart, PhD

Predictors of Risk for Children of Drug-Abusing Parents: Michelle Kelley, PhD

Children of Alcoholics & Children of Drug Users: Differential Effects of Parenting on Child Adjustment: William Fals-Stewart, PhD

Respective Contributions of Parenting Dimensions in Adolescent Substance Use: Catherine Stanger, PhD

Discussant: Craig Colder, PhD

Presidential Address: Fri, 8/8 3:00 - 3:50, room 201D

Developmental Trajectory of Division 50: Rudy Vuchinich, PhD

Business Meeting: Fri., 8/8, 4:00 - 4:50

Poster Session: Alcoholism, Drug Abuse, and Other Addictive Behaviors—Recent Advances: Fri., 8/8, 4:00 - 4:50, Exhibit Hall

Executive Committee Meeting: Sat., 8/9, 8:00 – 10:50, Fairmont Royal York Hotel, Banff Hospitality Suite

Symposium: Understanding Compulsive Sexual Behavior: Sat., 8/9, 9:00 – 10:50, room 713A

Co-chairs: Jon Morgenstern, PhD; Jeffrey Parsons, PhD

Compulsive Sexual Behavior: What is Currently Known: Eli Coleman, PhD

Exploring the Psychophysiological and Neuroanatomical Basis of Compulsive Sexual Behavior: Michael Miner, PhD

Examining the Nosology, Comorbidity, and Descriptive Features of Sexual Compulsivity: Jeffrey Parsons, PhD

Testing the Efficacy of an SSRI for the Treatment of Sexual Compulsivity: Jon Morgenstern, PhD

Workshop: New Paths to Recovery—Buprenorphine Treatment for Opiate Addiction: Sun., 8/10, 8:00 – 9:50, room 717B

Co-chairs: Charles Schuster, PhD; Laura McNicholas, MD

Symposium: The Intersection of ADHD and Adolescent Drug Abuse: Sun., 8/10, 12:00 – 1:50, room 714A

Chair: Ken Winters, PhD

Youth Drug Use Behaviors Use Outcomes of ADHD Children: William Pelham, PhD

Adolescent Drug Use Behaviors Among Children With ADHD: Ken Winters, PhD

ADHD Comorbidity and Treatment Outcome Among Adolescent Drug Abusers: William Latimer, PhD

ADHD, Other Disruptive Behaviors, and Adolescent Drug Treatment Outcomes: Nancy Jainchill, PhD

ADHD as Risk for Psychosocial Problems Among College Students: Bradley Smith, PhD

Discussant: Naimah Weinberg, MD
