

28 DIVISION PSYCHOPHARMACOLOGY AND SUBSTANCE ABUSE

From the President's Desk

William W. Stoops, Ph.D.

Summer has arrived and I am sure all of you are thinking about the upcoming convention in Toronto! Before I dive into that topic, I have a few news items to share. First, I want to acknowledge Carmela Reichel, Ph.D., who served as the division's liaison to the Committee on Women in Psychology (CWP) for the past three years and stepped down this spring. Mary Cain, Ph.D. has graciously agreed to take on this role. Thank you Carmela, for your service! Mary, we appreciate your willingness to join the division executive committee as our liaison to CWP! Second, our past council representative, John Grabowski, Ph.D., has agreed to serve on an ad hoc committee that will evaluate how APA Life Status membership affects divisions. Thank you, John! I know you will have a valuable impact on the committee's work on behalf of Division 28. Finally, we have received support or commitments to support this year's convention from three corporate affiliates: Eli Lilly and Company, Indivior and PinneyAssociates. A fourth corporate affiliate, Med Associates, maintains its substantial support of the Med Associates Brady-Schuster Award. I want to thank each of these affiliates for helping to make convention a success.

Now, on to convention, which is our main opportunity to show the fantastic work we do as a division. The 2015 program chair, Matt Weaver, Ph.D., has done a tremendous job pulling together our program. We will have our traditional outstanding sessions, including three awards addresses, five new fellows addresses, the NIDA/NIAAA/Division 28/Division 50 early career investigators poster session, along with a number of symposia and two paper sessions. I also want to highlight the three collaborative sessions co-sponsored by the division, which are a new feature of the Division 28 program. The APA Central Programming Group (CPG) reviews collaborative session proposals outside of the traditional divisional convention review structure. This process was developed as part of APA Council's plan to improve the convention experience by increasing collaboration among divisions to create programming. The CPG evaluates nearly 200 collaborative program applications for fit with convention themes, scientific content and potential interest to a broad APA audience (among other things). This application process is highly competitive, so it is a mark of distinction that three of our collaborative proposals were accepted. These sessions do not count against our division programming hours, so they allow us to make a broader contribution to convention than we normally would with the time allocated just to Division 28 programming.

Our first collaborative proposal was submitted in partnership with Divisions 2, 25, 35, 44 and 45. That session will feature experts discussing best practices for mentoring diverse undergraduate students. It will promote the inclusion of underrepresented populations and viewpoints into

Our first collaborative proposal was submitted in partnership with Divisions 2, 25, 35, 44 and 45. That session will feature experts discussing best practices for mentoring diverse undergraduate students. It will promote the inclusion of underrepresented populations and viewpoints into

psychology at an undergraduate level. The second session will present research with technologies that can be used to monitor behavior in real time, co-sponsored with Divisions 8, 16 and 25. This exciting session will be of interest to individuals who want to be able to track and study psychopharmacology or substance abuse in the natural ecology. The third session, co-sponsored with Division 6, will feature national and international experts in reproductive behavior and psychopharmacology research. The main goal of that session is to present cutting edge science that informs our understanding of the links between sexual risk taking and drug use. It promises to be a fascinating session.

Our collaborative sessions particularly represent the best aspects of Division 28 and its members. For nearly 50 years, we have been innovative educators and researchers who also have a dedication to serving our profession and working with those in other disciplines (information about how we will be celebrating 50 years of Division 28 is forthcoming). In 1966, Division 28 was created in response to the perceived need for an APA division dedicated to the scientific study of psychopharmacology, with substance abuse added to our name in 1986, because existing divisions lacked that multidisciplinary approach. The need for translational research that has become so popular today was apparent to our division leaders in the 1960s! Members of Division 28 maintain a strong eye for the future today, as evidenced by presentations at this year's convention. We actively engage diverse viewpoints from undergraduates through to senior scientists. Our fundamental dedication to using rigorous behavioral and pharmacological research techniques to tackle scientific problems both old and new is clear. So, how do we ensure that these values are transmitted for the next 50 years of the division and beyond?

One of my presidential initiatives was to increase communication between senior and junior division members. We have much to learn from one another—sharing knowledge and building networks across generations is the best way for us to meet future challenges faced by Division 28. In my last column, I asked you to communicate with the public about your work. In this column, I am making another communication request. I am willing to bet that we are all pretty comfortable talking to those in our peer group (i.e., those at the same career level). I do not think we talk to those at different career levels as much, especially people outside of our institutions or those who are not our mentors/mentees. So, if you are a senior Division 28 member, seek out a junior member. If you are a junior member, seek out someone more senior. Convention is a great place to do this, because

although APA is a large convention overall, we routinely have more intimate settings in which to meet as a division. Start a conversation and learn from each other. Help out a fellow member with a scientific quandary, talk to him or her about something innovative you are doing in the classroom or offer/accept an opportunity to engage in service if you are able. By building networks across generations and sharing our successes, we enrich one another and further strengthen our small (but mighty) division!

Early Career Psychologist Column

Adriana Falco, Ph.D. & Diann Gaalema, Ph.D.

Mentorship Benefits for Early Career Psychologists

The mantra of the research profession is publish or perish. Here are some thoughts about what has worked for me recently as well as advice I've gotten from established researchers.

Just make yourself do it. Find your mentor, work out some goals about what is reasonable for you and what you should aim for. Do they think you need to shoot for a certain number to be successful in your field? I've also been advised that you should always be working actively on a paper, if you have a paper in review you should also have a different one that you're getting ready to send down the line.

So how do you get started? A few considerations. Planning on applying for a grant soon? Get a paper submitted that helps show you're an expert in what you're proposing. Have pilot data? Great, get that out there. Don't? Write a review of the literature or go get yourself some data. Some easy places to look? Analyze a national survey data set that helps get at your question. There are many out there and most are easy to access. Or you could go online and gather some data. More recently folks in psychology have been having good luck recruiting participants through Amazon Mechanical Turk for completing surveys or other tasks that can be hosted online.

But likely you already have some data lying around. How about the conference poster/talk you just did? The work is halfway done you just need to throw it into a Word document and keep the momentum rolling. The most important part of writing is to just get it done. And how do you do that? Set some time aside for writing. For me, this consists of having two time slots per week that are dedicated to writing. Monday afternoons you'll find me at the library at a "writing retreat." Just, me, a laptop, a cup of coffee, and 3-10 other faculty members all focused on getting some words on the page. Thursday night you'll find me at Starbucks hosting a writing night for people in our research group who just need a place and a time where there are no excuses not to write. You too can try to find an existing group, or make your own. Get in touch with your library and see if they do/would like to host such a thing, or send an offer out on your departmental listserv offering to host. Will you need to write outside of these times? Of course, it's amazing the kind of progress you can make chipping away at a manuscript 20 minutes at a time, but the point is to have some time dedicated to nothing but writing. No excuses, and it keeps the process moving. So think about what you should work on, get the data together, schedule yourself some dedicated writing time and just get going!

... HAVE SOME
TIME DEDICATED
TO NOTHING BUT
WRITING. NO
EXCUSES, AND IT
KEEPS THE
PROCESS MOVING.

Diann Gaalema

Advocacy Update

Mikhail Koffarnus, Ph.D.

NIH Funding Increase Receives Legislative Support

A recent bill called 21st Century Cures that would increase National Institutes of Health (NIH) funding by \$8.75 billion over five years [received overwhelming support](#)¹ in the House (vote of 344 to 77 in favor). This bill would represent the first substantial increase in the \$30 billion budget of NIH in many years. Adjusted for inflation, the NIH budget has effectively [decreased by more than 20%](#)² since 2003. The bill contains a provision to increase funding opportunities for young investigators, with the aim of decreasing the average age that NIH applicants receive their first research grant. The Food and Drug Administration would also receive a budget increase of \$550 million, which would go in part toward accelerating the approval process for new drugs. The bill, which is primarily offset by cuts in funding to Medicare and Medicaid, will be considered by the senate this fall. [APA testified](#)³ before congress in April in support of increased NIH funding, and has released [fact sheets](#)⁴ for each state to show members of congress how NIH and National Science Foundation funding impacts their representatives.

The Independent Review of APA and CIA Collusion during the War on Terror

For many years, APA has actively and effectively advocated at the federal level for a number of issues of concern to its membership, with topics including substance abuse, funding for health research, health disparities, and [more](#).⁵ This advocacy, which is the subject of this recurring column, has been effective due at least in part to APA's reputation as an authority on ethical guidelines and just treatment of at-risk populations. An independent review of APA's involvement in the CIA's interrogation of prisoners during the Bush Administration's War on Terror was recently [released by APA](#)⁶ after being leaked to the [NY Times](#).⁷ The report concludes that links between APA officials and the CIA legitimized interrogation techniques widely considered to be torture. Shortly after the report was released, three senior APA leaders [resigned](#)⁸ and Stephen Behnke, APA's ethics chief, has been [removed from service](#).⁹ At the time of this writing, the full consequences of this report are rapidly developing, but it is clear that APA's role as a effective advocacy organization may be hindered going forward.

A town hall session to discuss the independent review will be held at the APA Convention at 3:00 to 4:30 p.m. on Saturday, August 8 in Constution Hall 106, North Building, Level 100, Metro Toronto Convention Centre.

Student-Oriented Programming at Convention

Are you a student attending the Convention in Toronto and lost sorting through the website to map out talks and programs you're going to attend? The website can be complicated and you may be overwhelmed by the breadth and depth of programs offered.

The APAGS (American Psychological Association of Graduate Students) and Science Student Council sponsor a variety of programs that may be of interest. APAGS scheduled events occur primarily in their hospitality suite located at the Fairmont Royal York Hotel. APAGS will also have a booth in APA Member Resources located in Exhibit Halls D and E, South Building-Level 800, Metro Toronto Convention Centre, where you can obtain additional information on relevant programming.

Highlights from the APAGS workshops and programming are listed below and check out their website (<http://www.apa.org/convention/programming/apags/index.aspx>) for additional details and guides (e.g., a Student Survival Guide):

THURSDAY, AUGUST 6TH:

- "Food For Thought Breakfast"
7:30 a.m. – 8:50 a.m., APAGS Suite
Psychologist: Nadine Kaslow, PhD
APAGS hosts Food for Thought Breakfasts each morning of convention in the APAGS Suite. The breakfast consists of a buffet and discussion hour with an eminent psychologist. Breakfast is from 7:30 – 8:00 a.m. and the discussion hour is from 8:00 – 8:50 a.m.
- "Set Goals, Say No, and Still Graduate"
10:00 a.m. – 11:50 a.m., APAGS Suite
- "Creating Your Research Program: How to Develop a Unified Research Narrative During Graduate School"
11:00 a.m. – 11:50 a.m., Convention Center
- "Student Leadership Development: From Theory to Practice and Beyond"
2:00 a.m. – 2:50 p.m., APAGS Suite
- "Flying Solo Social Hour"
4:00 a.m. – 4:50 p.m., APAGS Suite
- "APAGS Social"
6:00 p.m. – 8:00 p.m., TBD

FRIDAY, AUGUST 7TH:

- "Food For Thought Breakfast"
7:30 a.m. – 8:50 a.m., APAGS Suite
Psychologist: Benjamin Miller, PsyD
- "Psychology Without Borders: Internationalizing Your Psychology Teaching, Research, and Service"
8:00 a.m. – 9:50 a.m., Convention Center
- "APAGS Poster Session: Showcasing Graduate Student Research"

10:00 a.m. – 10:50 a.m., Convention Center, Exhibit Hall

- "Student Led Resistance: Mobilizing for Social Justice Post #Ferguson"
10:00 a.m. – 11:50 a.m., APAGS Suite
- "Financial Literacy for Students and Recent Graduates"
11:00 a.m. – 12:50 p.m., Convention Center
- "Hands on Stats: A Guide to Basic Statistical Analysis"
1:00 p.m. – 2:50 p.m., APAGS Suite
- "The Dirty Little Dos and Don'ts of the Dissertation and Thesis Process"
3:00 p.m. – 3:50 p.m., APAGS Suite

SATURDAY, AUGUST 8TH:

- "Food For Thought Breakfast"
7:30 a.m. – 8:50 a.m., APAGS Suite
Psychologist: Helen Neville, PhD
- "Alternative Career Paths with a Doctorate in Psychology"
9:00 a.m. – 10:50 a.m., Convention Center
- "Non-Traditional Students and Graduate School: Shared Experiences, Personal Challenges, and Open Discussion"
11:00 a.m. – 11:50 a.m., Convention Center
- "Peer Review Journals: Reading and Responding to a Review Letter"
3:00 p.m. – 3:50 p.m., APAGS Suite

SUNDAY, AUGUST 9TH:

- "Food For Thought Breakfast"
7:30 a.m. – 8:50 a.m., APAGS Suite
APAGS Governance

2015 APA Convention

Matthew T. Weaver, Ph.D.

Division 28 Program Description and Highlights at the 2015 Convention

The 2015 Convention of the American Psychological Association in Toronto, ON, is fast approaching! As always, this year's Division 28 program includes several strong symposia, invited addresses, new fellows' addresses, paper sessions, poster sessions, collaborative programing, and continuing education opportunities. We have arranged for a diverse program that encompasses novel uses of technology, adolescent development, and more. We are also co-hosting many events with allied divisions, societies, and institutions. A brief [program brochure](#)¹ providing times and places is available, but please take a minute to look over some highlights:

Invited Addresses include the annual *Outstanding Dissertation Award* (Allison Kurti), *Young Psychopharmacologist Award* (Kelly Dunn) and the *MED Associates Brady-Schuster Award* (Mark Sobell). Additionally, we'll be treated with *New Fellows' Addresses* from Cecile Marczynski, Cathy Stanger, Karen Ingersoll, Mark LeSage, and Eric Donny.

We are happy to continue our involvement in the *2015 NIAAA/NIDA Early Career Investigator Poster Session and Social Hour*. This event, co-sponsored with the Society of Addiction Psychology (Division 50), is a great opportunity to meet up-and-coming researchers and clinicians, or become re-acquainted with established peers. It is open to all conference attendees and will include light hors-d'oeuvre and a cash bar.

Division 28 is excited to have three offerings in *Collaborative Convention Program*, which was developed to highlight APA as a unifying force in psychology. The offerings all have broad appeal, timely topics, innovation, interactive/creative formats, scientific basis, and attention to diversity. Through this program Division 28 was able to include more program hours and collaborate with the following societies and divisions: Society for the Teaching of Psychology (2), Behavioral Neuroscience and Comparative Psychology (6), Society for Personality and Social Psychology (8), School Psychology (16), Behavior Analysis (25), Society for the Psychology of Women (35) Society for the Psychological Study of Lesbian, Gay, Bisexual and Transgender Issues (44), and Society for the Psychological Study of Culture, Ethnicity and Race (45). Our *Collaborative Convention Program* offerings include:

- Sex, Drugs, and Dopamine: A Recipe for Risk?
- Mentoring Diverse Undergraduate Students
- Using Technologies to Assess, Improve, and Monitor Behavior in Real-Time

Interested parties can earn credits toward *Continuing Education in Psychology* at the following symposia:

- Sex Differences in Marijuana's Effects in Human and Animal Studies--- Equal Opportunity for Abuse?
- Technology and substance use disorders: Expanding our methods and improving our science

Specialized *Symposia and Paper sessions*, all which are co-sponsored with the Society of Addiction Psychology (50), include:

- HIV and Substance Use---Using Technology to Understand and Intervene Upon Risk Behaviors
- Brown University's Alcohol Research Center on HIV---Initial Findings

- Marijuana on the Adolescent Brain? Exploring Neurodevelopment and Behavior
- Using Technologies to Assess, Improve, and Monitor Behavior in Real-Time
- Exercise as an Adjunct Treatment for Substance Use Disorders
- Topics in Alcohol Use and Abuse
- Topics Related to Psychopharmacology and Substance Abuse

We would like to thank the National Institute on Alcohol Abuse and Alcoholism (R13 AA022858) as well as our corporate affiliates - MED Associates, Indivior, Pinney Associates, and Eli Lilly - for sponsorship of portions of our 2015 Division 28 program. We must also stress that program content is solely the responsibility of the author(s) and does not necessarily represent the official views of our affiliates or granting institution(s).

We are looking forward to another strong program and hope to see many of our members in Toronto, ON from August 6-9 for the 2015 Convention of the American Psychological Association. *Remember to bring you passport!*

Division 28 Membership Information

Individual Memberships

Division 28 is committed to

- Basic and Applied Research
- Undergraduate, Graduate, and Postdoctoral training
- Evidenced-based Clinical Practice
- Public Service and Advocacy

We accept APA members and non-members, and have different membership levels available for students, early career psychologists (terminal degree within the past 7 years), and regular members.

Members receive a thrice yearly newsletter, and are eligible for 1 of 3 annual awards (Outstanding Dissertation, Young Psychopharmacologist, Med Associates Brady/Schuster Award).

Please contact our membership chair Dustin Stairs (dustinstairs@creighton.edu) or visit our membership page at <http://www.apadivisions.org/division-28/membership/index.aspx> for more information!

Corporate Affiliate Memberships

Corporate contributions support efforts in research, practice, and education. A membership contribution of \$1000 is tax deductible *

Division 28 is pleased to offer the following benefits to our corporate affiliate members:

- Access to thrice yearly newsletter
- Acknowledgement of support with corporate logo in newsletter
- Newsletter acknowledgement hyperlinked to corporate website, and available to all through newsletter posting on the Division 28 website
- Recognition of corporate support at annual APA membership meeting
- Liaison(s) eligible to subscribe to Division members-only listserv
- Liaison(s) participation in active and growing Division 28 social media presence
- Receive overview of relevant programming at APA convention

For questions regarding Division 28 and Corporate Affiliate Membership visit our website for more information at <http://www.apadivisions.org/division-28/membership/index.aspx> or contact:

Dr. William Stoops (Division 28 President) at william.stoops@uky.edu

OR

Dr. Jane Acri (Division 28 Treasurer) at jacri@nih.gov

* This is the recommended level of support. Any corporate contributions are tax exempt, and our tax number will be supplied upon request. Other levels of support are available.

Training and Employment Announcements

OREGON HEALTH & SCIENCE UNIVERSITY (OHSU) CHAIR OF THE DEPARTMENT OF BEHAVIORAL NEUROSCIENCE, SCHOOL OF MEDICINE PORTLAND, OR

The Oregon Health & Science University (OHSU) School of Medicine invites applications and nominations for the position of Chair of the Department of Behavioral Neuroscience (BEHN). Behavioral Neuroscience is a pivotal, highly interconnected department in the School. It is the largest of seven basic science departments and has a long tradition of research excellence with particular strengths in studies of drug and alcohol abuse, behavioral genetics, drug reinforcement and reward, and cognitive neuroscience. The total research grant funds awarded to BEHN faculty members last year totaled approximately \$11 million, including funding of two National Institute of Health (NIH) center awards. The department also administers three NIH funded training programs.

The next chair of BEHN will take over a well-run and successful department within a thriving university that is deeply invested in advancing neuroscience. There is great discovery power in neurosciences at OHSU and, in addition to BEHN, further neuroscience expertise exists across campus in a wide array of institutes and departments. The chair will be a leader in the neuroscience community at OHSU, and play a key role in defining and shaping a coherent identity and vision for the department, and contribute to developing a university-wide strategic plan for neuroscience research.

Reporting to the dean of the School of Medicine, the chair will plan, lead, organize, and direct the academic, research, and business affairs of the department and represent BEHN in internal and external interactions. OHSU will consider any outstanding PhD, MD, or MD/PhD scientist with a thriving research program in an area relevant to the broad field of behavioral neuroscience, and a strong commitment to the education of doctoral students. S/he will think innovatively about science, and support and/or perform translational research. The successful candidate will also have exceptional leadership qualities along with the vision to integrate and inspire the neuroscience community.

To apply: All inquiries, nominations, and applications should be sent via Isaacson, Miller's website: www.imsearch.com/5430

OHSU is an equal opportunity, affirmative action institution. Women, minorities, individuals with disabilities, and veterans are encouraged to apply. AA/EOE

UNIVERSITY OF VERMONT'S CENTER ON BEHAVIOR AND HEALTH POSTDOCTORAL RESEARCH FELLOWSHIPS

The **University of Vermont's Center on Behavior and Health** announces the availability of NIH postdoctoral research fellowships in an internationally recognized center of excellence for the study of substance abuse.

Appointment: 2-3 yrs.

Eligibility: Applicants must have completed their training in psychology, behavior analysis, or a related discipline and be U.S. citizens or permanent residents. Trainees are selected on the basis of scholastic record and commitment to a career in substance abuse research.

Benefits: Stipend, medical insurance coverage, and travel funds supported by NIH Institutional Training Awards.

For more information: See the Center's website (www.uvm.edu/medicine/behaviorandhealth) or contact Ms. Diana Cain (Diana.Cain@uvm.edu). **To apply:** Forward curriculum vitae, statement of research interests, and 3 letters of reference to: Attn: Drs. Stephen Higgins, Sarah Heil, and Stacey Sigmon c/o Ms. Diana Cain (Diana.Cain@uvm.edu).

JOHNS HOPKINS UNIVERSITY POSTDOCTORAL RESEARCH FELLOWSHIPS IN SUBSTANCE ABUSE AND PSYCHOPHARMACOLOGY HUMAN RESEARCH TRAINING

Postdoctoral research fellowships available in a stimulating, productive program with excellent resources. Prepare to be an independent investigator.

HUMAN LABORATORY -- behavioral & clinical pharmacology of abused drugs (abuse liability, self-administration, cognitive/ memory function, impulsivity, neuroimaging); anti-drug abuse medication development; behavioral research related to addiction: delay discounting, behavioral economics, and sexual risk behavior. Opioids, cocaine, anxiolytics, alcohol, caffeine, nicotine, hallucinogens, psilocybin, salvinorin A, MDMA, methamphetamine.

CLINICAL TRIALS - testing medications, behavioral therapies (especially incentive/contingency-based), and combinations; psychiatric comorbidity research; addiction & pregnancy/women; therapeutic applications for psilocybin (cancer anxiety & smoking cessation). Opioid, cocaine, tobacco, mixed/other dependencies

Eligibility: U.S. citizen, permanent resident. Many backgrounds are appropriate, including experimental or clinical psychology, pharmacology, psychiatry, neuroscience, public health, and social work. Background in human or nonhuman research is appropriate

NIH stipend levels: \$37,000 to \$51,000

Start Date: Flexible.

Faculty: George Bigelow, Roland Griffiths, Maxine Stitzer, Eric Strain, Kenneth Silverman, Robert Brooner, Miriam Mintzer, Una McCann, Ryan Vandrey, Anthony DeFulio, Matthew Johnson

To apply: Contact George Bigelow; BPRU, Behavioral Biology Research Center; 5510 Nathan Shock Drive; Johns Hopkins Bayview Campus; Baltimore, Maryland 21224-6823. (410) 550-003, bigelow@jhmi.edu. For more information see www.bpru.org.

**THE UNIVERSITY OF TEXAS HEALTH SCIENCE CENTER
AT SAN ANTONIO
RESEARCH SCIENTIST**

The Division of Neurobehavioral Research (Department of Psychiatry, UT Health Science Center at San Antonio), is seeking a motivated individual to join our ongoing NIH studies of the behavioral and biological effects of human alcohol consumption. These studies bridge human laboratory assessment and interventions to reduce dangerous drinking patterns outside the lab. This is a "springboard" position designed to allow the candidate to grow into a faculty-level position. The division offers training in the areas of behavioral pharmacology (Dr. Donald Dougherty), psychiatry (Dr. Rene Olvera), psychophysiology (Dr. Charles Mathias), neuroimaging (Dr. Ashley Acheson), and molecular biology (Dr. Nathalie Hill-Kapturczak). This position has a significant administrative/supervisory focus with ample opportunities for publication. Responsibilities include study coordination and supervision of study personnel; participant recruitment, screening, and psychological testing; data management and statistical analyses; and manuscript/grant preparations. Applicants must have completed a Ph.D. or equivalent degree in behavioral pharmacology, experimental psychology, or other relevant area. Previous postdoctoral experience preferred and preference given to those with a history or evidence of interests in developing an alcohol-related research program.

To apply: Submit curriculum vitae, a letter outlining interests and career goals, and representative publication reprints (pdf files) to: Dr. Donald M. Dougherty DoughertyD@uthscsa.edu, Department of Psychiatry, University of Texas Health Science Center at San Antonio,

MC 7793, 7703 Floyd Curl Drive, San Antonio, TX 78229-3900. UTHSCSA is an Equal Opportunity/Affirmative Action Employer.

**UNIVERSITY OF CALIFORNIA, SAN FRANCISCO (UCSF)
POSTDOCTORAL TRAINEESHIP IN DRUG ABUSE
TREATMENT AND SERVICES RESEARCH**

POSTDOCTORAL SCHOLARS: Two-year NIH/NIDA-funded positions as postdoctoral scholars in drug abuse treatment and services research are available in a multidisciplinary research environment in the Department of Psychiatry, University of California, San Francisco. Applications will be considered until all slots are filled. Scholars work with a preceptor to design and implement studies on the treatment of drug dependence, and select a specific area of focus for independent research. Training of psychiatrists, women, and minorities for academic research careers is a priority. Send letter of interest, CV, research statement, samples of work, and two (2) letters of recommendation to:

Postdoctoral Training Program in Drug Abuse
Treatment/Services Research
University of California, San Francisco
1001 Potrero Avenue, Bldg 20, Ward 21, Rm 2130
San Francisco, CA 94110-3518;
